Traditional and Contemporary Outdoor Fireplaces

Carol Rose Coastal Collection 36-inch Outdoor Stainless Steel Traditional Premium Fireplace with Outdoor Wildwood Refractory Log Set in a custom surround.

CAROL ROSE

These special outdoor products are named for customer service manager Carol Rose Burtz, who has been with Empire for more than 50 years. As the first time we have named a product for an employee, this represents an appropriate honor recognizing Carol's exceptional history with the company.

Outdoor

OUTDOOR FIREPLACES, FIREBOXES AND BURNERS

A fireplace extends the season for the outdoor living space you worked so hard to create. Our Carol Rose Coastal Collection includes complete outdoor fireplace systems, contemporary burners, and traditional log sets and burners - so you are sure to find a warm addition to suit your outdoor décor.

Our Green Earth Preferred intermittent pilot (IP) system fits your eco-friendly lifestyle by eliminating the standing pilot light for even greater energy savings and reduced emissions. IP systems include an on/off, high/low remote control.

Our Millivolt systems (available on traditional fireplaces) include a standing pilot - to light easily and operate without electric power - ideal for outdoor installations where power is not readily available. Millivolt systems will operate with an optional remote or wall switch.

All of our outdoor burners and fireplaces are available in LP and Natural Gas models.

Our outdoor fireboxes accept any burner certified for outdoor ventless applications.

These products are designed for outdoor installation only. For installation on a covered deck or porch, at least two sides of the enclosure must remain open at all times.

All our outdoor hearth products feature stainless steel for all exterior surfaces to provide lasting beauty. Stainless cleaner, available from your fireplace dealer, will help keep your fireplace or burner looking new for years.

Fireplaces

FIREPLACES AND FIREBOXES

Choose a traditional fireplace and a refractory log set or a contemporary fireplace with its elegant linear burner. Both fireplaces are available in 36-inch and 42-inch – perfectly sized for your outdoor living space.

With its concealed controls, your outdoor fireplace will present a clean, sleek look. The optional folding glass doors help keep out leaves and debris, but open quickly when you are ready to light a fire. Or use the optional stainless steel cover to completely enclose your fireplace when not in use.

Fireboxes

An outdoor firebox offers the same construction as our fireplaces, but lets you choose a contemporary burner or a traditional log set that suits your taste.

Read the owner's manual before installation, as some construction materials – such as concrete and grout – will etch or scratch the stainless steel. All external stainless steel surfaces are covered with a film to protect the fireplace during installation. The film must be removed before using the fireplace.

An optional stainless steel drain pan is available to help control and re-direct any moisture that collects beneath the fireplace.

Remote controls offered for use with outdoor systems are not weatherproof and must be protected from sun and moisture.

OUTDOOR CONTEMPORARY FIREPLACES

With its stainless steel facade, liner, and burner this complete fireplace system perfectly reflects the best in modern outdoor living.

Rated at 36,000 Btu for the 36-inch fireplace and 40,000 Btu for the 42-inch, the elegant linear burner within the fireplace generates both light and warmth to captivate your guests. The valve and controls are completely concealed beneath the burner top.

The Intermittent Pilot system includes an on/off remote control.
Available in LP or Natural Gas.

OUTDOOR TRADITIONAL FIREPLACES

This traditional fireplace features an all-stainless exterior. Inside the fireplace, a special stainless steel version of our popular Harmony burner lights up the night with 50,000 Btu. The standard refractory liner and the required refractory Wildwood Log Set provide thermal mass to help minimize temperature fluctuations for your guests.

Both the 36-inch fireplace and the 42-inch are rated at 50,000 Btu, and both have their valve and controls concealed beneath the fireplace floor.

Choose Millivolt or IP, both available in LP or Natural Gas.

Burners

OUTDOOR BURNERS

Our outdoor burners allow you to convert your existing outdoor fireplace into a convenient gas system. The result? You spend more of your time entertaining friends and family in your outdoor living space, and less time trying to maintain a wood fire.

We offer a traditional burner, with refractory logs, and a contemporary linear burner.

Available in LP or Natural Gas, these burners are designed for installation in an outdoor fireplace or firebox only.

Harmony

HARMONY BURNERS & WILDWOOD LOG SETS

The Carol Rose Coastal Collection includes the Wildwood Refractory Log Set designed specifically for outdoor use with our Harmony Stainless Steel Burner. Both the 24-inch burner and the 30-inch are rated at 50,000 Btu to generate plenty of flames to complement the massive concrete log sets.

These special burners feature internal baffles to induce movement in the flames for an exceptionally natural looking fire. Choose Millivolt or Intermittent Pilot.

Carol Rose Coastal Collection 24-inch Loft Stainless Steel Outdoor Burner in a custom masonry surround.

Contemporary

CONTEMPORARY BURNERS

Our contemporary burner completes your modern outdoor décor. With stainless steel top and linear burner, these attractive, modern systems deliver 36,000 Btu in 24-inch models and 40,000 Btu in 30-inch - plenty of fire to warm your guests and light up your outdoor event.

This freestanding linear burner provides a modern twist on the outdoor fireplace - creating ambiance and light.

Available in IP only - in LP or Natural Gas. These burners are designed for installation in an outdoor fireplace or firebox only.

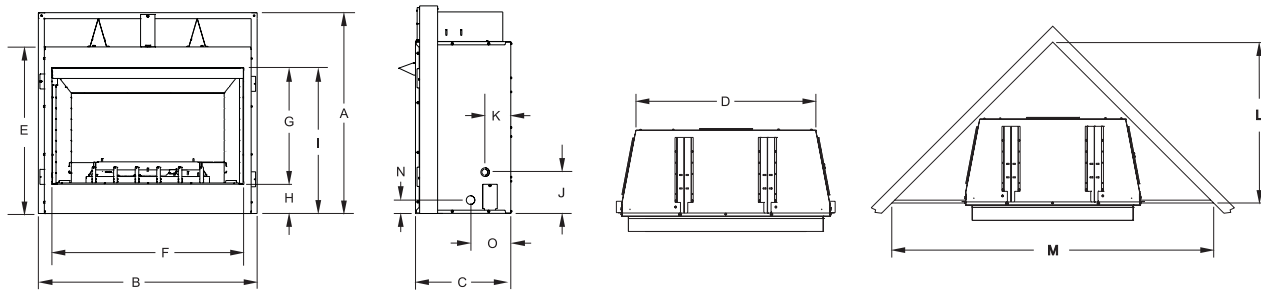

Specifications

FIREPLACE/FIREBOX SPECIFICATIONS

Fireplace/Firebox includes two metal studs and noncombustible backer board.
Additional materials may be required for installation.
